***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a reporting method, classified in class 705, subclass 27.
- II. Claims 2-10, drawn to a product acceptance device, classified in class 902, subclass 22.
- III. Claims 11, drawn to a selection method, classified in class 705, subclass 26.
- IV. Claim 12, drawn to software for selecting a product, classified in class 717, subclass 101.
- V. Claims 13, drawn to memory medium, classified in class 369, subclass 191.
- VI. Claim 14, drawn to a computer terminal, classified in class 710, subclass 1.
- VII. Claims 15, drawn to network with an output, classified in class 709, subclass 250.

The inventions are distinct, each from the other because:

Inventions I-VII are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention each has separate utility such as a credit card payment system;

Library data population;

A contact ratification device;

Demographics database extraction method;

Software for matching people at a party;

Art Unit: 3627

A medium on which music is stored and played;

A kiosk for electing a political official and

A system for sending e-mails, respectively. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to PRIMARY EXAMINER Joseph A. Fischetti at telephone number (703) 305-0731.
